

LEELA MANI SANKAR PEERUKATTLA

Software Engineer | Backend, Full-Stack, Cloud & AI-Enabled Applications

leelamanisankarpeerukattla@gmail.com | [linkedin.com/in/leelamanisankar-peerukattla](https://www.linkedin.com/in/leelamanisankar-peerukattla) | github.com/leelamanisankarpeerukattla

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable full-stack applications, backend systems, and data-driven platforms across enterprise and marketplace environments. Strong background in service design, distributed workflows, database-backed applications, cloud-ready architecture, testing, observability, and AI-assisted product development. Focused on building reliable, maintainable systems that support real users, evolving business workflows, and production-quality software delivery.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, Bash

Frontend: React, Next.js, HTML, CSS, Tailwind CSS, jQuery

Backend & APIs: Spring Boot, Node.js, REST APIs, GraphQL, Microservices, JWT/RBAC

Data & Messaging: PostgreSQL, MySQL, IBM DB2, MongoDB, Supabase, Redis, Apache Kafka

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Linux, Git, GitHub Actions, Jenkins, CI/CD

Testing, Monitoring & AI: JUnit, Mockito, PyTest, Postman, Selenium, Splunk, Prometheus, Grafana, OpenAI API, Claude, Cursor AI, GitHub Copilot, Lovable

PROFESSIONAL EXPERIENCE

Software Developer | Community Dreams Foundation - Pawtel | Remote / United States | *Apr 2026 - Present*

- Build API-backed product workflows for Pawtel, an AI-enabled marketplace supporting provider onboarding, booking/scheduling, messaging, and admin review experiences.
- Develop REST services, Supabase/PostgreSQL data models, and React/TypeScript workflows that give customer, provider, and admin users reliable access to marketplace data.
- Use Python and OpenAI API to support AI-assisted intake, service matching, response drafting, and customer engagement workflows while reviewing outputs for quality and maintainability.
- Convert changing product requirements into QA scenarios, acceptance criteria, API notes, validation rules, structured logs, and release handoffs for smoother feature delivery.

Digital Specialist Engineer | Infosys - Walmart Global Tech / Sam's Club Client | Bengaluru, India | *Sep 2021 - Dec 2023*

- Developed and supported enterprise backend services using Java, Spring Boot, REST/GraphQL APIs, Kafka, Redis, PostgreSQL, IBM DB2, Docker, Kubernetes, Jenkins, and GCP for high-volume retail catalog workflows.
- Built and optimized catalog ingestion and product update APIs, improving data availability for customer-facing experiences and internal business users.
- Implemented Kafka event workflows, Redis caching, validation logic, and SQL/DB2 query improvements to support consistent API behavior and reduce unnecessary database load.
- Improved release quality through unit, integration, regression, and API testing with JUnit, Mockito, Postman, and CI/CD validation.
- Monitored logs, metrics, and integration behavior using production support practices; documented API, deployment, troubleshooting, and technical design details for team handoffs.

PROJECTS

Enterprise Full-Stack Order Management System | *Java, Spring Boot, React, TypeScript, PostgreSQL, Redis, Kafka, Docker, Kubernetes*

- Built a full-stack order platform with REST APIs, JWT/RBAC authentication, database-backed services, Redis caching, Kafka-driven events, Dockerized services, Kubernetes manifests, and CI/CD-ready structure.

Distributed API Rate Limiter | *Java, Spring Boot, Redis, Lua, Docker, Actuator, JUnit*

- Implemented token bucket and sliding-window rate limiting with per-user/IP/endpoint controls, standard rate-limit headers, Actuator metrics, integration tests, and Dockerized local validation.

JPMorgan Chase Software Engineering Virtual Experience - Midas Core | *Spring Boot, Kafka, JPA, H2, REST APIs*

- Completed an enterprise-style backend simulation involving Kafka consumer integration, transaction validation, persistence, external API integration, and balance endpoint delivery.

EDUCATION

Master of Science in Computer Science | University of Central Missouri, Warrensburg, MO | Jan 2024 - Dec 2025 | CGPA: 3.7

Bachelor of Technology in Computer Science | Raghu Engineering College, Visakhapatnam, India | Jul 2017 - Jul 2021 | CGPA: 3.6

CERTIFICATIONS

Prompt Engineering for Everyone - Cognitive Class | Claude 101 - Anthropic | AI Fluency - Anthropic | Oracle Cloud Infrastructure Foundations Associate | Oracle Cloud Infrastructure AI Foundations Associate | JPMorgan Chase Software Engineering Virtual Experience - Forage
